# PLAN A CAREER AS A DENTAL HYGIENE

SCRUBS CAMP

## PREPARE FOR YOUR FUTURE

A dental hygienist is a licensed dental professional who specializes in preventative oral health. Typically working with a dentistry office, dental hygienists provide specialized cleanings for patients, take prescribed radiographs, and provide instructions for dental care.

Entering a career as a dental hygienist is a difficult but rewarding task. Your first step is to earn an associate's degree from BHSU. We have created a recommended program of study that will make your journey to becoming a dental hygienist a reality.

## COURSES AVAILABLE

- **BIOL 121** - Basic Anatomy & 121L Lab
- **BIOL 123** - Basic Physiology & 123L Lab
- **BIOL 231** - General Microbiology & 231 Lab
- **BIOL 286** - Word Origins
- **CHEM 106** - General Survey I & 106L Lab
- **CHEM 107** - General Survey I & 107L Lab

## PURSUE YOUR DEGREE

The best option is to pursue an associate degree in Applied Health Sciences
