PLAN A CAREER IN AGRICULTURE

PLANT PRESSING

PREPARE FOR YOUR FUTURE

This program gives students a strong biological background to apply to the practical aspects of agriculture or advance to graduate school.

A bachelor's degree in biology or business prepares graduates for agriculture and/or agriculture related entrepreneurial careers.

Students who are interested in an advanced degree would then be prepared to enter a master's program in research planning, sustainability, advanced agronomy, or other related areas of study. Students are encouraged to consider graduate school to earn a Ph.D. degree if they are planning to teach at the college level or for advancement to administrative research positions.

COURSES AVAILABLE

- **BIOL 151** - General Biology I & 151L Lab
- **BIOL 153** - General Biology II & 153L Lab
- **BIOL 301** - Plant Systematics & 301L Lab
- **BIOL 357** - Invertebrate Zoology 357L Lab
- **BIOL 461** - Astrology & 461L Lab
- **CHEM 112** - General Chemistry I & 112L Lab
- **CHEM 114** - General Chemistry II & 114L Lab
- **ENGL 101** - Composition I
- **ENGL 102** - Composition II
- **ECON 201** - Principles of Microeconomics
- **MATH 114** - College Algebra
- **PHYS 111** - Introduction to Physics I & 111L Lab
- **PHYS 113** - Introduction to Physics II & 113L Lab

PERSUE YOUR DEGREE

Depending on your interests, you could pursue a degree in:

- » Biology
- » Business
