BLACK HILLS STATE UNIVERSITY LIBRARY & LEARNING CENTER RENOVATION PROJECT

ABOUT THE E.Y. BERRY LIBRARY

The E.Y. Berry Library was built in 1973 and is nearly 50 years old. Education has changed significantly since the construction of the library. The structure is in need of an upgrade to keep up with the demands of current education methods and the future of learning.

WHAT'S BEING ADDED

A large addition to the second floor will be made to provide more space for students and a great view of beautiful Spearfish and Lookout Mountain. Under this addition, there will be an outdoor café seating area for students to enjoy. A new open staircase and a west entrance to the library will also be added.

A Student Success Center will be open for anyone who needs it, providing professional advising, tutoring, the Math and Writing Assistance Centers.

- [NOTICE for the Faculty/Staff Parking Lot](#)

NOTICE: Faculty/Staff Parking Lot

Construction for the Library Renovation Project has begun on February 15, 2021 through June 2022. The construction contractors will be using the first two lanes of the Faculty and Staff parking lot during this period. The contractors will be parking their vehicles, equipment and material in this area. This area has been blocked off with concrete blocks. Please do not park or drive through this area. Use extra caution while driving around the concrete blocks; we have already had a few fender benders with the concrete blocks! There are orange cones to help alert drivers on the location of these blocks.

Thank you for your patience and cooperation. Please contact Facilities Services or Public Safety for questions.
