

BHSU was the first South Dakota University to join the American College and University President's Climate Commitment, a consortium of 400 universities across the nation dedicated to address global warming.

MASTER OF SCIENCE IN SUSTAINABILITY

IMPLEMENT REAL-WORLD SOLUTIONS TOWARD A SUSTAINABLE SOCIETY

The Master of Science in Sustainability degree is offered entirely online. The program informs students about theoretical and practical issues relevant to sustainability – great preparation for communicating problems with stakeholders and implementing real-world solutions to work towards a sustainable society.

This inter-disciplinary and innovative program provides students with knowledge that enables understanding of the complex relationship between environmental factors, natural systems, economic structures, legal frameworks, socio-political forces and policy options. The challenges and solutions relating to a sustainable future lean on these comprehensive ideas.

A degree in this program will give students the edge needed to advance in future careers while making a difference in the environment.
